*care beyond compliance*

Of all the things you aspire to most as a doctor, navigating the jungles of CMS quality reporting programs is likely near the bottom. At the top, of course, is *caring for your patients*. It's what you aspire to do most. It's why you became a doctor.

The Merit-based Incentive Payment System (MIPS) offers doctors the promise of incentives for demonstrating quality care. That may all be good, but the journey itself is a complete hassle. Getting over the finish line is frustrating and confusing and demands a significant amount of your time and attention – time and attention you could be spending on caring for your patients.

- Imagine not having to waste another minute interpreting CMS requirements, cobbling together reporting data, fixing errors and tracking submissions to CMS.
- Imagine having your own compliance team who keeps you up to date on CMS programs and directs your progress so you don't have to waste time at conferences or wading through CMS materials and updates.
- Imagine the confidence that comes from knowing you are not only maximizing reimbursements, but also limiting risk in an audit.

RevAspire is a RevolutionEHR-enabled solution that supports, equips and assists you through the entire process of CMS quality reporting while freeing you to spend more time with your patients.

LEARN MORE

**FOCUS** your time on  
what you **ASPIRE** to most

Say goodbye to the hassles of quality reporting program participation, data submission, and related audits and get on with what you aspire to most — caring for your patients.

## ✓ Score Optimization

You take great care of your patients. RevAspire makes sure your data accurately reflects that care. RevAspire acts as your virtual compliance team putting you at an advantage against small practices and levels the playing field with the larger practices your performance is compared to.

### Performance Data Analysis and Guidance

- Quarterly MIPS score estimates, peer comparisons, and discussion
- End-of-year data analysis to determine optimal data ranges

### Legislative Distillation

- Experts in quality reporting and RevolutionEHR
- 1000+ page government rules broken down to just what you need to know in RevolutionEHR to excel

### Exclusive Education and Support Options

- RevAspire-exclusive events such as webinars and virtual office hours as well as email and phone availability. RevAspire will help in the manner that works best for you

## ✓ Data Submission

You focus on your patients while RevAspire makes sure the proper people know how well you did at the right time. No more need to collect and analyze data, manage website credentials, navigate state or federal-level portals, etc. RevAspire handles everything for you.

### Merit-based Incentive Payment System (MIPS)

- Submission of all performance category data
- Submission progress tracking and troubleshooting, as necessary

## ✓ Audit Protection

If you find yourself facing a quality reporting audit, RevAspire experts will prepare your formal response to help you pass with minimal effort. A doctor partnered with RevAspire has never failed a quality reporting audit and had to return money to CMS.

RevAspire Pricing is **\$104** per doctor per month
